First let me thank you for your time. I am a subscriber to XM satellite radio and a long haul truck driver. The service that XM provides to me is not only entertaining, but has become somewhat vital in the planning of my trips, pick ups, and deliveries. I am speaking of thier instant traffic and weather reports for various cities. It allows for me to change my route if need be, or to delay by an hour or so, going into a city. That saves me fuel and frustration, not to mention one more of the larger vehicles adding to the jam. You have a petition # 04-160, coming to you from the National Association of Broadcasters (NAB), asking that XM be banned from continuing this service. I ask that you please reject this petition, again, thank you for your time in this matter.
